Your health at a glance (simple summary)

Bhavya's chart shows a sensitive constitution - health benefits greatly from discipline, prevention and early medical attention.

Body type

Ayurvedic body type: Vata. The dominant element is Vata (air) - prone to dryness, nervousness, joint and digestive irregularity.

Natural strengths

- Planets that give stamina and fighting power against disease are well placed.
- Good indications for longevity.

Points needing care

- The Moon is weak - the mind and emotions need care, and stress can affect physical health.
- The ruler of the body (ascendant lord) is under strain - energy and resistance can dip during difficult periods.
- Difficult planets influence the ascendant - the body is more exposed to strain, injuries or inflammation.
- Some protective planets are retrograde, so their protection is less reliable.

Right now

You are currently in the Jupiter-Mercury planetary period (until 19-10-27). Its health tone is demanding - be attentive to health (72/100). The sub-period planet Mercury relates to nerves, skin, speech, intellect.

Body-system risk assessment (all disease templates)

In simple words: Every part of the body is linked to a sign, a house and a planet. Here each body system is scored by how strongly difficult planets influence it and how much protection beneficial planets give. 50 is average; higher means more care is needed.

Low (<38) Mild (<50) Moderate (<62) Elevated (<74) High (<101)

Each system combines the Kalapurusha body-sign factors seen from Lagna, Moon and Sun, the planets that signify the organ, the nature of the afflicting planets (separative, chronic, sudden, fiery, poisonous...) and matching classical yogas. Click to see every factor and influence.

Ashtakavarga strength

In simple words: Ashtakavarga gives each sign a strength score (0-8 per planet, total usually 18-40). Low scores show weaker areas, and planets passing through low-score signs tend to give harder results.

Lifetime health-stress timeline (multi-system composite)

In simple words: This graph shows how health stress rises and falls through life by combining the planetary periods (dashas), planetary transits and yearly charts. Shaded bands are the periods that need more care.

Composite = Vimshottari 45% + transits 25% + Yogini 12% + Chara 8% + Tajika 10%. Threshold 55 (top quintile of this chart). **21.5%** of life is flagged as needing extra care; the rest of life is comparatively easier.

Health-watch windows (19)

In simple words: These are the specific periods where several timing methods agree that health needs extra attention. Major windows deserve the most care; the most sensitive sub-periods are listed.

Estimated ages of onset of physical trouble

In simple words: A classical method that estimates the approximate age when physical trouble connected with the body, chest/mind, illness and chronic-condition houses may first show up.

House	Lord	Theme	Estimated age	Working
1	Venus	body / general health	**12**	base 20 (average year of Venus); malefic surrounding -2; lord well placed (3th) +2; Mercury conjoins lord -2; Saturn conjoins lord -2; Mars aspects lord -4
4	Saturn	chest, mind, comforts	**22**	base 28 (average year of Saturn); net malefic occupation of house -2; Jupiter aspects house +2; Ketu aspects house -4; lord well placed (3th) +2; Mercury conjoins lord -2; Venus conjoins lord +2; Mars aspects lord -4
6	Jupiter	disease, injury	**14**	base 24 (average year of Jupiter); Moon aspects house -4; Ketu aspects house -4; lord well placed (10th) +2; lord Exalted +2; Ketu conjoins lord -2; Rahu aspects lord -4
8	Venus	chronic/serious illness, longevity	**4**	base 20 (average year of Venus); net malefic occupation of house -2; Sun aspects house -4; Rahu aspects house -4; lord well placed (3th) +2; Mercury conjoins lord -2; Saturn conjoins lord -2; Mars aspects lord -4

Base years: Mercury 16, Mars 18, Venus 20, Moon 22, Jupiter 24, Sun 26, Saturn 28; ±2 for conjunction/surrounding, ±4 for aspect. Confirm with the running dasha.

Vimshottari dasha - full health scoring (MD / AD / PD)

In simple words: The Vimshottari dasha divides life into planetary periods (Mahadasha) and sub-periods (Antardasha, Pratyantardasha). Each is scored for health; higher scores mean the planet ruling that time is more troublesome for health.

Yogini dasha

In simple words: Yogini dasha is a second, shorter (36-year) cycle of planetary periods used to confirm the main dasha.

Traditional remedial measures

In simple words: Traditional remedies aim to strengthen helpful planets (gemstones) and pacify troublesome ones (mantra, charity, worship). They are supplementary and never replace medical care.

Traditional remedial suggestions only. Gemstones/rituals do not replace diagnosis or treatment by a qualified physician.

Gemstones (strengthen weak benefic factors)

Planet	Gem	Reason
Venus	Diamond (Heera) / white sapphire	Ruling stone - lagna lord; lagna lord is weak
Moon	Pearl (Moti) in silver	Isolated planet - strengthen its tissue

Propitiation (for afflicting planets - mantra, charity, worship)

Planet	Mantra	Charity	Day / deity
Moon	Om Shraam Shreem Shraum Sah Chandraya Namah (11000)	White clothes, milk, rice, silver - to a woman on Mondays	Monday / Parvati/Shiva
Mars	Om Kraam Kreem Kraum Sah Bhaumaya Namah (10000)	Red cloth, red lentils (masoor), books - to a student on Tuesdays	Tuesday / Hanuman / Kartikeya
Mercury	Om Braam Breem Braum Sah Budhaya Namah (9000)	Whole green moong, green vegetables, green cloth - on Wednesdays	Wednesday / Vishnu
Saturn	Om Praam Preem Praum Sah Shanaischaraya Namah (23000)	Black sesame (til), iron, mustard oil, coal, whole urad - to an old poor person on Saturdays	Saturday / Hanuman / Shani
Sun	Om Hraam Hreem Hraum Sah Suryaya Namah (7000)	Wheat, oranges, jaggery (gur), copper - on Sundays to a middle-aged man, preferably a Govt. servant	Sunday / Surya; Aditya Hridayam
Ketu	Om Sraam Sreem Sraum Sah Ketave Namah (7000)	As for Mars; blankets, sesame to the needy	Tuesday / Ganesha
Rahu	Om Bhraam Bhreem Bhraum Sah Rahave Namah (18000)	As for Saturn; also to lepers and people shunned by society	Saturday / Durga

Mind/nerves: Emerald set in silver (Mercury + Moon); meditation, regular sleep; seek professional mental-health support when needed.

Ayurvedic constitution guidance: Warm, moist, grounding food; regular routine and sleep; Oil massage (abhyanga) with sesame oil; Avoid cold/dry food, fasting, over-exertion and late nights

Preventive screening during flagged windows is a sensible, non-astrological precaution.

Guiding principles

If any one of the four factors of an afflicted limb has a benefic influence the disease is curable by medical treatment; if all four are exclusively under malefic influence the tradition calls it hard to cure.

The ruling stone (gem of the lagna lord) is always safe to wear when the lagna lord is weak.

Strengthen (gem) a functional benefic / yogakaraka that is weak; never give the gem of a malefic that harms by location or aspect during its period - prescribe japa, puja and charity instead.

For disease caused by weak lords of 2/6/7/8/12 the stone of the running sub-period lord may be considered (only if that planet is not itself the afflictor).

An isolated afflicted planet (in trik, under malefic influence, without benefic influence) may be strengthened by its stone.

Mind/brain disorders: Emerald (Mercury) set in silver (Moon). Heart trouble: Ruby in gold. Weak Saturn as lord of 1/3/8: steel/iron ring.

Medical remedies of today are far superior and more reliable; astrological propitiation is a supplementary, preventive measure only.

How to read this report

Start with **Your health at a glance** - it summarises everything in everyday language.
Scores run from 0 to 100: 50 is an average horoscope; 62+ means the area is clearly highlighted; 74+ strongly highlighted.
Dates are shown as dd-mm-yy (day-month-year).
Watch windows combine several independent timing methods; when many agree, the indication is stronger.
The astrological sections that follow the summary show every calculation behind the reading for an astrologer to verify.

This knowledge base encodes traditional astrological associations for research and educational purposes. It is not a clinically validated diagnostic system. A horoscope cannot establish whether a person has or will develop any disease, nor reliably predict dates of onset. Always consult qualified medical professionals for diagnosis, investigation and treatment.
