

Nav Tara Reading

Which stars work for a Hasta-born native, and when the window opens and closes its doors.

Window 12-10-2026 to 13-10-2027

The nine taras - what each one means

Counting from your Moon star, the twenty-seven nakshatras fall into nine repeating groups. Five favour action, three oppose it, and one - your own - is simply sensitive. Here is what each means when you choose a day.

Janma (Birth star - your own): Sensitive to body and health. Neither lucky nor unlucky, but a day to avoid strain, risk and overexertion; keep to rest and routine.

Sampat (Wealth): Prosperity and gain. Highly auspicious for money matters, purchases, new ventures and anything you want to grow.

Vipat (Danger / loss): Obstacles, loss and accident. Do not begin new work, travel or signings; postpone the important.

Kshema (Well-being): Security and health. Auspicious and safe - good for health, savings, steady work and protective acts.

Pratyak (Opposition): Resistance and hidden enemies. Effort meets friction; avoid confrontation, competition and launches.

Sadhaka (Accomplishment): Achievement and completion. What you start now tends to finish - ideal for goals and important tasks.

Vadha (Destruction - the harshest): Harm and danger. Strictly avoid all auspicious work, travel and ventures; take extra care with health and conflict.

Mitra (Friend): Friendly support and goodwill. Good for meetings, alliances, negotiations and seeking help.

Ati-Mitra (Great friend - the strongest): The most auspicious star of all - the best time for anything that truly matters.
