Longevity Critical-Period Report

Important disclaimer — read before anything else

This report is a traditional astrological analysis, not a medical, actuarial or scientific forecast. It cannot tell anyone how long they will live or when they will die. No astrological method has been shown in controlled studies to predict an individual's lifespan or date of death better than ordinary age-, sex- and country-based statistics.

Critical periods — past, now and upcoming

Most common classical longevity category

LONG

4 of 7 methods agree · median classical Ayurdaya figure **80 years** (range 12–88.2)

BPHS (Maraka chapter): Balarishta to 8, Yogarishta to 20, Alpayu (SHORT) to 32, Madhyayu (MIDDLE) 32–64, Purnayu (LONG) 64–100, beyond 100 divine. The three-pair method keeps its own class label. These are classical Ayurdaya numbers, not a prediction of age at death (SEL-04).

How many independent method families flag each year of life (peak in that year)

What is a method family?

A family is a group of related methods counted as one vote. When several rules inside one family fire on the same day they describe the same underlying fact (for example one Saturn position), so they count once (NAT-15, CP-N-05). "N of 12 families" means N independent timing systems flag the same span.

#	Family	What it includes	Share of ages 0–100	Active now
1	**Vimshottari Tier 1 (AD)**	Vimshottari Mahadasha–Antardasha where both lords are maraka (2nd/7th) or 6th/8th/12th-related planets and at least one is a maraka	43%	yes

3	**Chara dasha**	Jaimini Chara dasha signs that are 2nd, 7th or 8th from Lagna, hold Rudra, or are 8th from the Atmakaraka	15%	
4	**Shoola dasha**	Shoola dasha signs that are maraka houses or the 8th, hold Rudra, or are aspected by Rudra (rashi drishti)	41%	
5	**KP DBA**	KP Dasha–Bhukti–Antara where all three lords signify the 2nd, 7th or badhaka house	100%	yes
6	**Saturn transit**	Saturn in the 8th from Lagna, Moon or natal Saturn; in the Ashtakavarga remainder signs or nakshatras; in Vadha tara or Vainashika nakshatras (Sade Sati, Saturn return and low-bindu signs are shown but not counted)	49.9%	yes

8	**Node transit**	Rahu or Ketu over the natal Moon sign, the Lagna sign, or the 8th from Lagna	48.9%	yes
9	**Tajika annual**	Years with Muntha in the 6th/8th/12th, annual Lagna on the natal 8th sign, or the annual 8th lord in the annual Lagna	36%	
10	**Western annual**	Years with a profection to the 8th, the solar-return Ascendant in the natal 8th sign, or Mars/Saturn within 5° of the solar-return angles	19%	
11	**Ashtakavarga ages**	The years of age equal to the bindu sums from Lagna to Saturn, Saturn to Lagna, and their total (Saturn's Bhinnashtakavarga)	3%	
12	**Mahadasha sandhi**	±180 days around each change of Vimshottari Mahadasha	7.9%	

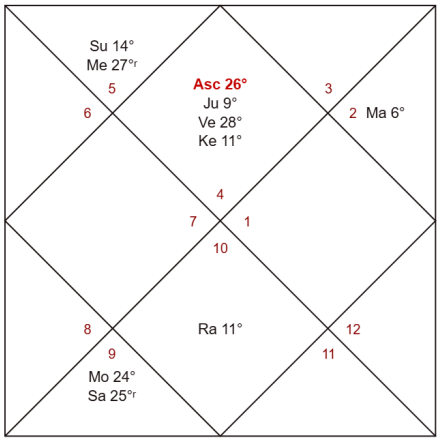

More families agreeing means more traditional systems coincide; it is not a probability and not a date of death (CP-F-04, CP-V-07).
Together the families flag most of a life, so a single family, or a low count, carries little information. The report therefore ranks spans by how many families agree and shows how unusual a given count is.
Only spans reaching the agreement threshold are listed as critical periods.

Ayurdaya — every method with its calculation

1. Parashari three-pair method (PAIR-01 to PAIR-17)

Pair	Constituents	Modalities	Class
A — Lagna lord / 8th lord	Moon in Sagittarius / Saturn in Sagittarius	dual + dual	MIDDLE
B — Saturn / Moon	Sagittarius / Sagittarius	dual + dual	MIDDLE
C — Lagna / Hora Lagna	Cancer / Cancer	movable + movable	LONG
Result	2 pair(s) agree · PAIR-10 majority		**MIDDLE → 72**

PAIR-14: LONG one-agreement figure: 96 or 91 by edition; configured 96.
PAIR-15: Degree-refined figure within the MIDDLE range: 66.6 (variant, mean degree of contributing points).
PAIR-16: Saturn contributes to the deciding pair: class could drop to SHORT (variant, off in consensus).
PAIR-17: Jupiter in a kendra or aspecting Lagna: class could rise to LONG (variant, off in consensus).

What is a method family?

A family is a group of related methods counted as one vote. When several rules inside one family fire on the same day they describe the same underlying fact (for example one Saturn position), so they count once (NAT-15, CP-N-05). "N of 12 families" means N independent timing systems flag the same span.

#	Family	What it includes	Share of ages 0–100	Active now
1	**Vimshottari Tier 1 (AD)**	Vimshottari Mahadasha–Antardasha where both lords are maraka (2nd/7th) or 6th/8th/12th-related planets and at least one is a maraka	43%	yes
2	**Yogini**	Yogini dasha periods of Sankata, or whose lord is a natal maraka planet	46.1%	
3	**Chara dasha**	Jaimini Chara dasha signs that are 2nd, 7th or 8th from Lagna, hold Rudra, or are 8th from the Atmakaraka	15%	
4	**Shoola dasha**	Shoola dasha signs that are maraka houses or the 8th, hold Rudra, or are aspected by Rudra (rashi drishti)	41%	
5	**KP DBA**	KP Dasha–Bhukti–Antara where all three lords signify the 2nd, 7th or badhaka house	100%	yes
6	**Saturn transit**	Saturn in the 8th from Lagna, Moon or natal Saturn; in the Ashtakavarga remainder signs or nakshatras; in Vadha tara or Vainashika nakshatras (Sade Sati, Saturn return and low-bindu signs are shown but not counted)	49.9%	yes
7	**Jupiter–Saturn double transit**	Jupiter and Saturn both occupy or aspect the 8th, 2nd or 7th house at the same time	44.6%	
8	**Node transit**	Rahu or Ketu over the natal Moon sign, the Lagna sign, or the 8th from Lagna	48.9%	yes

10	**Western annual**	Years with a profection to the 8th, the solar-return Ascendant in the natal 8th sign, or Mars/Saturn within 5° of the solar-return angles	19%	
11	**Ashtakavarga ages**	The years of age equal to the bindu sums from Lagna to Saturn, Saturn to Lagna, and their total (Saturn's Bhinnashtakavarga)	3%	
12	**Mahadasha sandhi**	±180 days around each change of Vimshottari Mahadasha	7.9%	

More families agreeing means more traditional systems coincide; it is not a probability and not a date of death (CP-F-04, CP-V-07).
Together the families flag most of a life, so a single family, or a low count, carries little information. The report therefore ranks spans by how many families agree and shows how unusual a given count is.
Only spans reaching the agreement threshold are listed as critical periods.

Saturn-transit family = 8th from Lagna/Moon/natal Saturn, Ashtakavarga remainders, Vadha and Vainashika nakshatras (Sade Sati, Saturn return and low-bindu signs are listed but not counted).
